

DEPARTMENT OF ENERGY

1000 Independence Avenue SW., Washington, DC 20585
Phone, 202-586-5000. Internet, www.energy.gov.

SECRETARY OF ENERGY	SAMUEL W. BODMAN
Deputy Secretary	CLAY SELL
Under Secretary for Science	(VACANCY)
Under Secretary of Energy	DAVID K. GARMAN
Assistant Secretary, Fossil Energy	JEFFREY D. JARRETT
Assistant Secretary, Energy Efficiency and Renewable Energy	ALEXANDER A. KARSNER
Assistant Secretary, Nuclear Energy	DENNIS R. SPURGEON
Administrator, Energy Information Administration	GUY F. CARUSO
Director of Science	RAYMOND L. ORBACH
Assistant Secretary, Environmental Management	JAMES A. RISPOLI
Director of Civilian Radioactive Waste Management	EDWARD F. SPROAT III
Under Secretary for Nuclear Security and Administrator for National Nuclear Security Administration	THOMAS P. D'AGOSTINO, <i>Acting</i>
Deputy Administrator for Defense Programs	THOMAS P. D'AGOSTINO
Deputy Administrator for Defense Nuclear Nonproliferation	WILLIAM H. TOBEY
Deputy Administrator for Naval Reactors	ADM. KIRKLAND H. DONALD, USN
Deputy Under Secretary for Counterterrorism	STEVEN AOKI
Chief Financial Officer	STEVEN JEFFREY ISAKOWITZ
Chief Human Capital Officer	JEFF T.H. PON
Chief Information Officer	THOMAS N. PYKE
General Counsel	DAVID R. HILL
Inspector General	GREGORY H. FRIEDMAN
Assistant Secretary, Congressional and Intergovernmental Affairs	JILL L. SIGAL
Assistant Secretary, Environment, Safety, and Health	C. RUSSEL SHEARER, <i>Acting</i>
Assistant Secretary, Policy and International Affairs	KAREN A. HARBERT
Director, Public Affairs	ANNE W. KOLTON
Director of Economic Impact and Diversity	THERESA ALVILLAR SPEAKE
Director of Hearings and Appeals	FRED L. BROWN, <i>Acting</i>
Director of Human Capital Management	CLAUDIA A. CROSS
Director of Intelligence and Counterintelligence	ROLF MOWATT-LARSEN
Director of Management	INGRID KOLB
Director of Health, Safety, and Security	GLENN S. PODONSKY
Director of Legacy Management	MICHAEL W. OWEN

Director of Electricity Delivery and Energy
Reliability

KEVIN M. KOLEVAR

FEDERAL ENERGY REGULATORY COMMISSION

888 First Street NE., Washington, DC 20426
Phone, 202-502-8055. Internet, www.ferc.gov.

Chairman
Commissioners

JOSEPH T. KELLIHER
SUEDEEN G. KELLY, PHILIP D.
MOELLER, MARC L. SPITZER, JON
WELLINGHOFF

The Department of Energy's mission is to foster a secure and reliable energy system that is environmentally and economically sustainable; to be a responsible steward of the Nation's nuclear weapons; to clean up the Department's facilities; to lead in the physical sciences and advance the biological, environmental, and computational sciences; and to provide premier scientific instruments for the Nation's research enterprise.

The Department of Energy (DOE) was established by the Department of Energy Organization Act (42 U.S.C. 7131), effective October 1, 1977, pursuant to Executive Order 12009 of September 13, 1977. The act consolidated the major Federal energy functions into one Cabinet-level Department.

Secretary The Secretary decides major energy policy and planning issues; acts as the principal spokesperson for the Department; and ensures the effective communication and working relationships with Federal, State, local, and tribal governments and the public. The Secretary is the principal adviser to the President on energy policies, plans, and programs.

Intelligence and Counterintelligence

The Office of Intelligence and Counterintelligence ensures that all departmental intelligence information requirements are met and that the Department's technical, analytical, and research expertise is made available to support U.S. intelligence efforts. The Office develops and implements programs to identify, neutralize, and deter foreign government or industrial intelligence activities directed at or involving Department programs, personnel, facilities, technologies, classified information, and sensitive information. The Office ensures effective use of the U.S. Government's

intelligence apparatus in support of DOE's need for information on foreign energy situations and hostile threats, information on global nuclear weapons development, nonproliferation, and foreign hydrocarbon, nuclear, and other energy production and consumption. The Office formulates all DOE intelligence and counterintelligence policy and coordinates all investigative matters with the Federal Bureau of Investigation.

For further information, contact the Office of Intelligence and Counterintelligence. Phone, 202-586-2610.

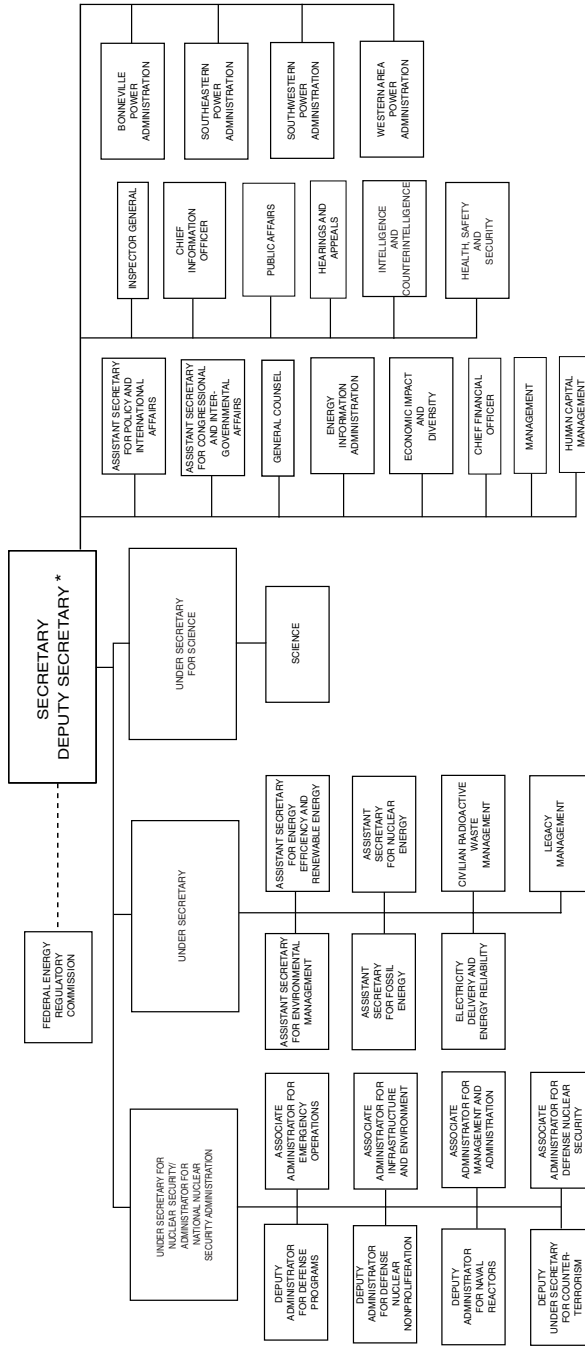

Health, Safety, and Security The Office of Health, Safety, and Security develops policies to protect national security and other critical assets entrusted to the Department of Energy. It also manages security operations for departmental facilities in the national capitol area.

For further information, contact the Office of Health, Safety, and Security. Phone, 301-903-3777.

Energy Programs

Renewable Energy The Office Energy Efficiency and Renewable Energy is responsible for formulating and directing programs designed to increase the production and utilization of renewable energy (solar, biomass, wind, geothermal, alcohol fuels, etc.) and hydrogen, and improving the energy

DEPARTMENT OF ENERGY

* The Deputy Secretary also serves as the Chief Operating Officer.

efficiency of the transportation, buildings, industrial, and utility sectors through support of research and development and technology transfer activities. It also has responsibility for administering programs that provide financial assistance for State energy planning; the weatherization of housing owned by the poor and disadvantaged; implementing State and local energy conservation programs; and the promotion of energy efficient construction and renovation of Federal facilities.

For further information, contact the Director of Management and Operations. Phone, 202-586-6768.

Fossil Energy The Office of Fossil Energy is responsible for research and development of programs involving coal, petroleum, and natural gas. The fossil energy program involves applied research, exploratory development, and limited proof-of-concept testing targeted to high-risk and high-payoff endeavors. The objective of the program is to provide the general technology and knowledge base that the private sector can use to complete development and initiate commercialization of advanced processes and energy systems. The program is principally executed through the National Energy Technology Laboratory. The Office also manages the strategic petroleum reserve, the northeast home heating oil reserve, and the naval petroleum shale reserves.

For further information, contact the Office of Communications. Phone, 202-586-6503.

Nuclear Energy The Office of Nuclear Energy, Science, and Technology manages the Department's research and development programs associated with fission and fusion energy. This includes programs relating to naval and civilian nuclear reactor development, nuclear fuel cycle, and space nuclear applications. The Office manages a program to provide radioactive and stable isotope products to various domestic and international markets for medical research, health care, and industrial research. The Office also conducts technical analyses concerning

nonproliferation; assesses alternative nuclear systems and new reactor and fuel cycle concepts; manages depleted uranium hexafluoride activities, highly enriched uranium downblend, natural uranium sales, and uranium enrichment legacy activities; and evaluates proposed advanced nuclear fission energy concepts and technical improvements for possible application to nuclear powerplant systems.

For further information, contact the Director of Management, Planning and Analysis. Phone, 301-903-3796.

Energy Information The Energy Information Administration is responsible for collecting, processing, publishing, and distributing data in the areas of energy resource reserves, energy production, demand, consumption, distribution, and technology. It performs analyses of energy data to assist government and nongovernment users in understanding energy trends.

For further information, contact the Director, National Energy Information Center. Phone, 202-586-6537.

Electricity Delivery and Energy Reliability The Office of Electricity Delivery and Energy Reliability leads a national effort to modernize and expand America's electricity delivery system. The Office is responsible for the enhanced security and reliability of the energy infrastructure and facilitates the recovery from disruptions to energy supply.

For further information, contact the Office of the Director. Phone, 202-586-1411.

Nuclear Security Programs

Nuclear Security The National Nuclear Security Agency (NNSA) was created by Congress through the National Defense Authorization Act for Fiscal Year 2000 (113 Stat. 512) to bring focus to the management of the Nation's defense nuclear security programs. Three existing organizations within the Department of Energy—Defense Programs, Defense Nuclear Nonproliferation, and Naval Reactors—were combined into a new, separately

organized and managed agency within DOE, headed by an Administrator who reports to the Secretary. The NNSA is responsible for strengthening United States security through military application of nuclear energy and by reducing the global threat from terrorism and weapons of mass destruction.

NNSA's service center and eight site offices provide operations oversight and contract administration for NNSA site activities, acting as the agency's risk

acceptance for the site. The site offices are responsible for the following functions: the safe and secure operation of facilities under the purview of NNSA; supporting NNSA programs to ensure their success in accordance with their expectations; and ensuring the long-term viability of the site to support NNSA programs and projects.

For further information, contact the Associate Administrator for Management and Administration. Phone, 202-586-8454.

Site Offices—National Nuclear Security Agency

Office/Address	Telephone
NNSA Service Center (P.O. Box 5400, Albuquerque, NM 87185)	505-845-6050
Site Offices	
Kansas City, MO (P.O. Box 41020, 64141)	816-997-3341

Sandia, NM (P.O. Box 5800, Albuquerque, NM 87185)	505-845-6036

Defense Activities The Office of the Deputy Administrator for Defense Programs directs the Nation's nuclear weapons research, development, testing, production, and surveillance program. It is also responsible for the production of the special nuclear materials used by the weapons program within the Department and the management of defense nuclear waste and byproducts. The Office ensures the technology base for the surety, reliability, military effectiveness, and credibility of the nuclear weapon stockpile. It also manages research in inertial confinement fusion.

For further information, contact the Associate Administrator for Management and Administration. Phone, 301-586-8454.

Naval Reactors The Office of the Deputy Administrator for Naval Reactors manages and performs research, development, design, acquisition, specification, construction, inspection, installation, certification, testing overhaul, refueling, operations procedures, maintenance, supply

support, and ultimate disposition of naval nuclear propulsion plants.

For further information, contact the Deputy Administrator for Naval Reactors. Phone, 703-603-5502.

Nuclear Nonproliferation The Office of the Deputy Administrator for Defense Nuclear Nonproliferation directs the development of the Department's policy, plans, procedures, and research and development activities relating to arms control, nonproliferation, export controls, international nuclear safety and safeguard, and surplus fissile materials inventories elimination activities.

For further information, contact the Associate Administrator for Management and Administration. Phone, 202-586-8454.

Environmental Quality Programs

Civilian Radioactive Waste Management

The Office of Civilian Radioactive Waste Management is responsible for implementation of the Nuclear Waste Policy Act of 1982, as amended (42 U.S.C. 10101 *et seq.*), which provides for the development of a permanent, safe geologic repository for disposal of spent

nuclear fuel and high-level radioactive waste.

For further information, contact the Director for Human Resources. Phone, 202-586-5975.

Environmental Management The Office of the Assistant Secretary for Environmental Management manages safe cleanup and closure of sites and facilities; directs a safe and effective waste management program, including storage and disposal of transuranic, and mixed low- and high-level waste; and develops and implements an applied research program to provide innovative technologies that yield permanent cleanup solutions at reduced costs.

For further information, contact the Director of Resource Management. Phone, 202-586-2661.

Legacy Management The Office of Legacy Management manages the Department's post-closure responsibilities and ensures the future protection of human health and the environment. The Office has control and custody of legacy land, structures, and facilities and is responsible for maintaining them at levels suitable for long-term use.

For further information, contact the Director of Property Management and Community Assistance. Phone, 202-586-3751.

Science Program

The Office of Science supports basic research that underpins DOE missions in national security, energy, and environment; constructs and operates large scientific facilities for the U.S. scientific community; and provides the infrastructure support for 10 national laboratories. In terms of basic research, the Office of Science provides over 40 percent of Federal support to the physical sciences (including 90 percent of Federal support for high energy and nuclear physics), the sole support to select sub-fields of national importance, such as nuclear medicine, heavy element chemistry, and magnetic fusion, and support for the research of scientists and graduate students located in universities throughout the Nation. Office of Science support for major scientific user facilities, including accelerators, synchrotron light sources, and neutron sources, means that more than 18,000 scientists per year are able to use these state-of-the-art facilities to conduct research in a wide range of fields, including biology, medicine, and materials.

For further information, contact the Director of Human Resources. Phone, 301-903-5705.

Federal Energy Regulatory Commission

The Federal Energy Regulatory Commission (FERC) is an independent agency within the Department of Energy which regulates the interstate transmission of electricity, natural gas, and oil. FERC has retained many of the

functions of the Federal Power Commission, such as setting rates and charges for the transportation and sale of natural gas and the transportation of oil by pipelines, as well the valuation of such pipelines. FERC also reviews proposals to build liquefied natural gas terminals and interstate natural gas

pipelines as well as licensing hydropower projects. FERC is composed of five members appointed by the President of the United States with the advice and consent of the Senate. FERC Commissioners serve 5-year terms and have an equal vote on regulatory matters. One member is designated by the President to serve as both Chairman and FERC’s administrative head.

For further information, contact the Office of External Affairs. Phone, 202-502-8004 or 866-208-3372. Fax, 202-208-2106. Internet, www.ferc.gov.

Operations and Field Offices

The vast majority of the Department’s energy and physical research and development, environmental restoration, and waste management activities are

carried out by contractors who operate Government-owned facilities. Management and administration of Government-owned, contractor-operated facility contracts are the major responsibility of the Department’s five operations offices and three field offices.

Department operations offices provide a formal link between Department headquarters and the field laboratories and other operating facilities. They also manage programs and projects as assigned from lead headquarters program offices. Routine management guidance, coordination, oversight of the operations, field and site offices, and daily specific program direction for the operations offices is provided by the appropriate Assistant Secretary, Office Director, or program officer.

Power Administrations

The marketing and transmission of electric power produced at Federal hydroelectric projects and reservoirs is carried out by the Department’s four Power Administrations. Management oversight of the Power Administrations is the responsibility of the Deputy Secretary.

Bonneville Power Administration The Administration markets power produced by the Federal Columbia River Power System at the lowest rates, consistent with sound business practices, and gives preference to public entities.

In addition, the Administration is responsible for energy conservation, renewable resource development, and fish and wildlife enhancement under the provisions of the Pacific Northwest Electric Power Planning and

Conservation Act of 1980 (16 U.S.C. 839 note).

For further information, contact the Bonneville Power Administration, 905 NE. Eleventh Avenue, Portland, OR 97232-4169. Phone, 503-230-3000.

Southeastern Power Administration

The Administration is responsible for the transmission and disposition of surplus electric power and energy generated at reservoir projects in the States of West Virginia, Virginia, North Carolina, South Carolina, Georgia, Florida, Alabama, Mississippi, Tennessee, and Kentucky.

The Administration sets the lowest possible rates to consumers, consistent with sound business principles, and gives preference in the sale of such power and energy to public bodies and cooperatives.

For further information, contact the Southeastern Power Administration, 1166 Athens Tech Road, Elberton, GA 30635-4578. Phone, 706-213-3800.

Southwestern Power Administration

The Administration is responsible for the sale and disposition of electric power and energy in the States of Arkansas, Kansas, Louisiana, Missouri, Oklahoma, and Texas.

The Southwestern Power Administration transmits and disposes of the electric power and energy generated at Federal reservoir projects, supplemented by power purchased from public and private utilities, in such a manner as to encourage the most widespread and economical use. The Administration sets the lowest possible rates to consumers, consistent with sound business principles, and gives preference in the sale of power and energy to public bodies and cooperatives.

The Administration also conducts and participates in the comprehensive planning of water resource development in the Southwest.

For further information, contact the Southwestern Power Administration, Suite 1600, Williams Center Tower One, One West Third Street, Tulsa, OK 74103-3532. Phone, 918-595-6600.

Western Area Power Administration

The Administration is responsible for the

Federal electric power marketing and transmission functions in 15 Central and Western States, encompassing a geographic area of 1.3 million square miles. The Administration sells power to cooperatives, municipalities, public utility districts, private utilities, Federal and State agencies, and irrigation districts. The wholesale power customers, in turn, provide service to millions of retail consumers in the States of Arizona, California, Colorado, Iowa, Kansas, Minnesota, Montana, Nebraska, Nevada, New Mexico, North Dakota, South Dakota, Texas, Utah, and Wyoming.

The Administration is responsible for the operation and maintenance of transmission lines, substations, and various auxiliary power facilities in the aforementioned geographic area and also for planning, construction, and operation and maintenance of additional Federal transmission facilities that may be authorized in the future.

For further information, contact the Western Area Power Administration, 12155 West Alameda Parkway, Lakewood, CO 80228-1213. Phone, 720-962-7000.

Sources of Information

Consumer Information For information on the consumer impact of Department policies and operations and for other DOE consumer information, call 202-586-1908.

Contracts and Small and Disadvantaged Business Utilization Activities

Information on business opportunities with the Department and its contractors is available electronically through the Internet, at www.pr.doe.gov/prbus.html. For information on existing DOE awards, call 202-586-9051.

Electronic Access Information concerning the Department is available through the Internet at www.energy.gov.

Employment Most jobs in the Department are in the competitive service. Positions are filled through hiring individuals with Federal civil

service status, but may also be filled using lists of competitive eligibles from the Office of Personnel Management or the Department's special examining units. Contact the Office of Human Capital Management. Phone, 202-586-1234.

Freedom of Information Act To obtain administrative and technical support in matters involving the Freedom of Information, Privacy, and Computer Matching Acts, call 202-586-5955.

Inspector General Hotline Persons who wish to raise issues of concern regarding departmental operations, processes, or practices or who may be aware of or suspect illegal acts or noncriminal violations should contact the hotline. Phone, 202-586-4073 or 800-541-1625.

Public Information Issuances, Press Releases, and Publications For media contacts, call 202-586-5575.

Public Reading Room For information materials on DOE and public access to DOE records, call 202-586-3142.

Scientific and Technical Information The Office manages a system for the centralized collection, announcement, and dissemination of and historical reference to the Department's scientific

and technical information and worldwide energy information. Contact the Office of Scientific and Technical Information, 175 Oak Ridge Turnpike, Oak Ridge, TN 37830-7255. Phone, 423-576-1188.

Whistleblower Assistance Federal or DOE contractor employees wishing to make complaints of alleged wrongdoing against the Department or its contractors should call 202-586-4034.

For further information concerning the Department of Energy, contact the Office of Public Affairs, Department of Energy, 1000 Independence Avenue SW., Washington, DC 20585. Phone, 202-586-4940. Internet, www.energy.gov.
